CAREER OBJECTIVE

Motivated Electronics and Communication Engineering undergraduate seeking entry-level IT opportunities and internships where I can apply my foundation in programming, web development, Linux, Git/GitHub, and problem solving. Eager to learn industry practices, contribute to real-world projects, and build a strong long-term career in the IT domain. Interested in expanding into infrastructure, cloud, and cybersecurity as my technical experience grows.

EDUCATION

B.E. — Electronics and Communication Engineering

2022 – Present

Sri Sairam College of Engineering, Bengaluru

Visvesvaraya Technological University (VTU)

TECHNICAL SKILLS

- **Programming:** Python, JavaScript fundamentals
- **Web:** HTML, CSS, responsive web development
- **Tools:** Git, GitHub, GitHub Desktop, VS Code
- **Operating Systems:** Linux / Ubuntu, Windows
- **Foundations:** Computer networks, problem solving, basic databases / SQL
- **Currently Exploring:** IT infrastructure, cloud fundamentals, cybersecurity concepts

PROJECTS

Password Generator — Python | GitHub

- Built a random password generator to practice Python programming, input handling, randomization, and basic security-oriented thinking. Published the project on GitHub.

Plugging the Leak — Smart Solutions for India's Water Loss Crisis — College / Solvathon | AI + IoT

- Worked on a technology concept addressing water loss using connected sensing, mapping, and data-driven approaches, with a focus on practical sustainability and resilience.

Personal Developer Portfolio — HTML | CSS | JavaScript | GitHub Pages

- Designed a responsive personal portfolio to showcase education, skills, projects, achievements, and links, with an animated developer-style interface.

PRACTICAL LEARNING

- Practiced Linux command-line fundamentals including file management, navigation, processes, and common shell commands.
- Learning Git/GitHub workflows including repositories, commits, pushing changes, and GitHub Pages deployment.
- Building programming and web-development skills through small projects and hands-on experimentation.
- Developing foundational knowledge of networking and modern IT technologies.

ACTIVITIES & ACHIEVEMENTS

- Participated in college innovation / project activities including Solvathon.
- IEEE student membership and participation in technical activities.
- Worked on SDG-oriented project concepts combining technology and sustainability.

CAREER INTERESTS

IT Support / IT Operations • Software & Web Development • Cloud & Infrastructure • Networking • Cybersecurity (long-term specialization)

ADDITIONAL INFORMATION

Languages: English and Tamil | Interests: Technology, gaming, travel, learning new tools
